

SOP: Changing from FBA to FBM or FBM to FBA

1. In order to change your Fulfillment Options from Fulfilled by Merchant (FBM) to Fulfilled by Amazon (FBA) or Vice Versa, select "Manage Inventory" from the Drop Down Menu of the "Inventory" tab on the top menu of Seller Central.
2. Select which products you would like to change to Fulfillment options for, click on the "Actions on X selected" button in the top left side of the table and select "Convert to Fulfilled by Amazon" if you are wanting Amazon to fulfil these products for consumers' orders going forward or "Change to Fulfilled by Merchant" if you wish to now fulfil consumer orders from your own warehouse.
3. Note that you cannot convert Parent ASINs to FBA.
4. Select your Child ASINs and click "Change to Fulfilled by Amazon" from the "Actions on X Selected" button at the top of the table.
5. On the next page, if you click on the "Convert and Send to Amazon" button then you will launch the Shipment Plan page for this ASIN.
6. If you click on the "Convert Only" button Amazon will ask whether these ASINs require batteries or any hazmat certifications.
7. If you select yes for either of these options then further drop down options will appear. For the purpose of this video, we will select no for both options.
8. After clicking the "Convert" button, your ASINs will then show up on the FBA Inventory Page.
9. Alternately, if you wish to convert from FBA to FBM, select your Child ASINs you wish to convert and select "Change to Fulfilled by Merchant" from the "Actions on X Selected" button.
10. On the next page, click the "Convert" button to save your changes.
