SOP: Editing Variations Manually

1. When we edit variations, we are referring to the variation itself, that is, size, colour, material, et cetera.

2. In order to edit variations manually, select "Manage Inventory" from the "Inventory" tab Drop Down Menu on the top menu of Seller Central.

3. Click on the arrow alongside the variations you wish to edit to reveal the variations of that parent ASIN below.

4. Click on the "Edit" Button to the right of the variation you wish to edit.

5. On the next page, proceed to edit the fields you wish to edit by scrolling along the tabs at the top.

6. Note that not all fields will be editable as this is the Child ASIN and these fields will normally relate to the Parent ASIN and so can only be edited in the Parent ASIN itself and not in the Child ASIN.

7. Any fields uneditable in the variation of a *Parent* ASIN in the variation table can only be edited if you click on the Child ASIN itself and go through to the Product Listing Edit Page.

8. If you select the UPC, you may not be able to change the variation, for example, the colour from black to grey or the size from small to medium.

9. It is more likely to accept the change if you select the ASIN of the product you wish to edit.

10. Otherwise you need to contact Support.

11. Note that you cannot change the Variation Theme manually here.

12. Once you have entered all the new changes, click the "Save and Finish" button at the bottom of the page.
